DATAPOINT
MOBILE ORDERING

Extend your Point of Sales with DataPoint's built-in ability to take orders anywhere with the same menus your staff is accustomed too.

PAX A920   CLOVER FLEX

SOLUTION

While DataPoint is primarily designed to easily make quick and secure payments, DataPoint offers order entry technology as well with its patented Point of Sales integration process. You can easily take full or partial orders, anytime and anywhere!

Our solution allows the user to create a new order directly on the same DataPoint terminal you use to make payments. Our orders are synced with your Point of Sale system in real-time. The menu is displayed on the handheld devices in the same logical order as displayed on the Point of Sale system in order to extend and simplify the ordering process. This process allows your managers to better manage your operations, and to help customers where and when the need you most.

EXPAND YOUR REACH

DataPoint Ordering module allows you to expand the reach of your Point of Sales system by adding the ability to order from any DataPoint payment terminal. This means you can take orders in the terrace, on the golf course, pool side, while delivering catering or throughout your dining room.

EASE OF USE

DataPoint is designed for restaurants of all types, from casual dining to high-end table service restaurants. DataPoint can be installed in your operation in less than one hour and can be implemented gradually. The average cashier takes 10 minutes to learn how to use DataPoint.

GRADUAL APPROACH

Using mobile ordering can increase your table turns and streamline your operations. DataPoint's ordering Module allows you to process full orders or just use it to start an order and take the first drink request. As well DataPoint Ordering can be used as an auxiliary terminal when at your busiest time.

CONNECTIVITY

DataPoint only operates on smart secured terminals. We have various terminals to choose from. DataPoint is processor agnostic allowing you to make decisions according to your processing needs. DataPoint can connect via Wi-Fi, Ethernet, 4g and even mobile hotspot so you can offer payments and orders anywhere you need to.

✓ PCI

SERVICES

SoftPoint offers merchants a customer centric solution to streamline operations and enhance security.

SECURITY
Secure EMV chip card acceptance and level one PCI compliance.

EFFICIENCY
Real-Time updates, with integrated menus, employee IDs, and tickets.

RELIABILITY
24/7 U.S. based expert customer support and care.

CONVENIENCE
On-the-go payment acceptance with built-in ordering capability.

ADVANTAGES

The technology industry is continually evolving and improving but there is one industry that has remained unaltered by advancements... until now. Currently operated by outdated software, costly legacy systems, unsecure vulnerable environments, and disconnected platforms, the hospitality industry is poised for innovation. That innovation is the brainchild of SoftPoint.

Whether you're a restaurant or retailer, your business needs a seamless and centralized offering that arms you with tools that engage consumers and helps you run your business more efficiently. SoftPoint has created a suite of products that encompass all of the business functions needed in today's world within one simple platform so you can operate at the highest levels without being slowed down by outdated technology.

SoftPoint is a name you can trust with years of experience. Contact us!
