KIOSKPOINT

Integrated unattended Kiosk solutions available today with your current point of sales system.

Available in multiple configurations and sizes

SOLUTION

SoftPoint designed and created its own wall and counter-mounted consumer Kiosk. These Kiosks can be used for customer interaction, ordering with payments, and even surveys. If the SoftPoint Kiosk is used for ordering, the user will be prompted with the same menu layout that you offer on your mobile or online ordering system. This creates consistency throughout all of your digital ordering systems.

Once the in-house or to-go order is completed, SoftPoint will create that order on your Point of Sale system and prompt the service line to prepare it just like it came in from any other mobile source. SoftPoint can then either allow the user to process a payment on the Kiosk or prompt the user to proceed to the cashier to initiate the payment process. The customer can then pick up his expedited order, enhancing the overall experience.
