Unique to PayPoint is its entry page, it allows for the user to collect pertinent information about the transaction as compared to just doing a payment for an amount. PayPoint is used in restaurants that do not have a Point of Sales system or a system that we do not integrate to today. It can also be used in hotels, retail, service, medical, and many more.

Unlike any other payment options, PayPoint allows you to use the terminal to collect data. Example a Veterinarian, can collect the owners account, name, the pets name and the service provided.

SMART PAY & INTELLEGEENCE

PayPoint has a complete dashboard where you can see all transaction. As well you can port your data to QuickBooks or other back office programs. This allows you to better manage your information.

CONNECTIVITY & NETWORK

Users of PayPoint you can opt to upgrade to our PayPoint Lite Point of Sale solution that will allow you to create ticket, add items, enter discount, surcharges or adjustments and make payments.
